New Volume 1, Number 49

CARBON, ALTA., THURSDAY, AUGUST 22, 1946 Authorized as second class mail, Post Office Department, Ottawa.

## Still Time For X-Ray Mobile Unit

The mobile X-ray Unit will be in Carbon on Saturday, Aug. 24 and Monday, Aug. 26.

Appointment cards (pink) have been sent out to all who returned their white cards. We still have some time available for any wishing an appointment. We would like to suggest that it is a very simple procedure and in no way will be embarrassing. This clinic is made possible by the sale of Christmas seals and we would like everyone to take advantage of this "free" opportunity.

Make your last minute appointments by phoning 24 and please bring your appointment cards with you. —I.O.D.E.

## New Rental Regulations

Effective August 15 landlords of shared accommodation may give a straight six months' notice to vacate terminating at any time the Prices Board announced.

Previously the six months' notice to vacate this type of accommodation was between September 30 and April 30.

The board has also announced that a lease for commercial accommodation may contain a clause should the landlord and tenant agree, to the effect that it can be terminated by the tenant only at a time specified and agreed upon notice. Previously, the lease could not be terminated by either parties prior to the end of the five year term.

## IN MEMORIAM

In loving memory of little Douglas Hugh Castiglione who lost his life in an accident on August 23, 1944.

Why was he taken so young  
and fair,  
Because he was a jewel God  
couldn't spare;  
Within our home where all was  
bright,  
God took from us that shining  
light.  
For we who loved him only  
know,  
How much we lost two years  
ago.

Sadly missed and ever re-  
membered by  
Mummy and Hughie.

Mr. Rae will give permanents  
in Carbon on Thursday, August  
29th. Book appointments with  
Vi Pattison.

Saturday nights at 8 the CBC invites Canadian listeners to go south of the border to the mythical city of "La Plaza" for a half hour of authentic Latin American rhythms. David Holman and Irma Laurence, as Pepe and Lolita above, sing the Spanish and Portuguese melodies. George Calangis, and his fifteen muchachos present the original arrangements of tangos, rhumbas, beguines, rancheros and paso dobles. Welcoming of el turista is narrator Jack Bingham, who meets the listeners each week at the Statue of Bolivar near La Plaza's famous Garden Cafe. The show originates in the CBC Vancouver studios.

## Threshers Can Help Save Crop

How to prevent threshing damage to crops of malting barley is outlined in a circular distributed last week by the National Barley Contest Committee headed by Prof. T. J. Harrison.

The instructions are of particular interest to competitors in the contest because improper threshing, it points out, may ruin a valuable crop of malting barley.

When threshing is started, the circular stresses, check carefully to see that the kernels are not injured. If there are many peeled, broken, or frayed kernels, immediately adjust the machine. Watch machine adjustments throughout the day's work because character of the barley changes with change in moisture content.

Damage may be caused by one or more of 12 causes which are listed in the circular as follows:

Too high speed of cylinder; irregular speed of tractor engine when combine is driven with power take-off; excess end play in cylinder; loose or cracked cylinder or concave teeth; too many concaves; improper wind adjustment; improper sieve adjustment; separator improperly levelled; faulty conveyor adjustment; uneven rate of feeding; combining immature grain; use of lower type of elevator at too high speed or improper clearance.

Mr. and Mrs. H. Greenlee and family are at Botha for a vacation. Mr. Alkins of Calgary is in charge of the local Crown Lumber office.

## Fall Rye

A reminder that fall rye is an excellent competitive crop for the control of weeds comes from A. M. Wilson, field crops commissioner. When seeded in the latter part of August this crop usually establishes a heavy fall growth. In the spring it quickly covers the ground and smothers many weeds.

To be successfully used in a weed control program rye must not be pastured in the fall or spring. Heavy fall pasturing may lead to winter killing or to delayed spring growth. If the crop is pastured in the spring the smothering effect on weeds is lost. Fall cultivation following rye will be particularly useful in controlling perennial weeds.

## CROP REPORT

The overall moisture condition for the three prairie provinces combined advanced one percent during the past week. The total moisture condition for the three provinces now stands at 87 percent of normal, compared with 86 percent last week and 89 percent at this time a year ago.

The condition in Alberta is now 87 percent of normal compared with 86 percent last week and 89 percent at this time a year ago.

It appears as though the total moisture condition of 87 percent of normal will give a higher yield per acre this year than a moisture condition of 89 percent of normal gave last year. This will give students of yield and rainfall an opportunity this year of observing the value of the incidence of rainfall. This year was most unusual for having an exceedingly dry April and May and an unusually wet June and July. It would appear that rains in June and July have greater yield producing ability than the same rains when spread over April, May, June and July.

A service will be held in Christ Church, Carbon on Sunday, August 25th at 3 p.m. Ven. Archdeacon Axon in charge. Vestry meeting to follow.

## OUR HALF ACRE

By J. G. UMBRITE,

Field Supervisor  
M. D. of Kneeshill

The weeds on a number of the roads in the municipality have been cut by the owners of the land bordering on them. These farmers are complying with the provisions of the Noxious Weeds Act. There are however a number of delinquent farmers who have not cut or destroyed these weeds.

The farmers who have not complied with the provisions of the act are again reminded to cut these weeds. The individual farmer is the one who reaps the benefit if the weeds are cut. If the weeds are allowed to remain standing they serve as a trap for the snow and eventually make the road impassable.

When weeds are allowed to mature along the roadsides they produce enough weed seeds to pollute the surrounding land. This is especially true of Canada Thistle as the seeds from this plant can be carried for great distances, infesting land that has been previously free of this pest. Where Canada Thistle are cut now they should be raked and burned to prevent the maturing and subsequent spreading of the seed.

Grassing down the ditches on the roads is the surest and best way of controlling weeds. Grass seed for this purpose is supplied by the municipality. For information regarding seed get in touch with your local councillor or field supervisor, municipal office, Three Hills.

## LITTLE ITEMS OF LOCAL INTEREST

Mr. and Mrs. Norman Nash spent a few days at Stettler this week.

Mr. A. McLeod, our local postmaster, underwent an operation in a Calgary hospital on Wednesday last.

Local machinery agents are busy setting up new implements these days.

Mr. and Mrs. Ed Rouleau and family of Didabury were Carbon visitors Sunday.

## Our Weekly Paper

When we head this Our Weekly Paper we mean that to be all-inclusive pronoun, to be applied by all of our readers. We especially want you to feel that you are a part of the paper. We want you to work with us toward the end of making it better so that you can take a pride in it. We think a successful country paper should be primarily a community enterprise. Of course the tangible property of the paper has to be privately owned and operated; but to be effective a paper's subscribers should feel a definite sense of responsibility in the activities of the paper.

Of course we have to make a little money, but the main reason for the publication of this paper is to further the welfare of the people it serves. We can best do this when we have the co-operation of all of you. Of course we have had the co-operation of a good many of you in the past but it is up to all of us to take a greater responsibility to help make our paper better.

So we urge you to contribute something to the paper whenever you can. Let us have a letter from time to time, discussing some subject which you think is timely. Remember that public opinion is a powerful force. Let's exercise that power through our paper and we will get things done.

Also you can help by sending us news items from your community which would be of general interest to people in the district. Our regular correspondents are doing a fine job but naturally they can't cover all the news.

So let's all co-operate and together we will make the Chronicle an outstanding institution, of which all of us can be proud.

## LOCAL NEWS ITEMS

Carbon ball team won the afternoon game but lost the evening encounter with Drumheller at the local diamond Sunday.

H. Maxwell and J. Reid returned to Carbon this week after spending the past year in Ontario.

Don't forget the show "True Glory" in the Scout hall tonite. Next week, "Tanks a Million."

Professor Bernard Heinze, Australian conductor, is coming to Canada in December at the invitation of the CBC. While here he will direct a series of symphonic broadcasts in Vancouver, Toronto and Montreal. Professor Heinze has had great influence on Australia's musical life. For many years he has shown particular interest in the musical education of youth, and his "Young People's Concerts" in Melbourne bring great orchestral music to over 75,000 school children.

## INTERESTING STORY—

## "YOU KNOW WHEN IT HAPPENS"

By Matthew F. Christopher

Copyright  
Wheeler Newspaper Syndicate

HE WAS a farm kid, and like some farm kids he had a slight stoop to his shoulders. His face was nearly raw from sunburn; but his blue eyes had a vivid sparkle she liked. And his reddish hair had a crispness to it like toast.

They stood together on the cinder driveway, with the moon hanging like a pumpkin up there in the sky. Light beamed from the windows of the garage where George and Carl were tinkering on a motorcycle.

"You know something," she said, low and serious. "I thought you'd be happier tonight."

He looked at her. A speckle of light glinted in his eye. "What makes you think I'm not?" She laughed. "I can tell."

"Mind reader?" "No. Lip reader." Her brown eyes shone. "You haven't kissed me, yet. Or don't you want to?"

He grinned. He lowered his head so that his lips met hers. There was slight pressure behind them, and something electrical that tingled her finger tips. But it was brief—and he hadn't put his arms around her.

"You're sweet," he said. "I like you." "That's because you don't know any other girl, if what you told me last night is true."

"It is," he answered. "What's more, I never kissed any other girl but you. How could I? Living alone with my father and mother, with no brothers or sisters, and working almost every minute of every day since I was old enough to carry a hoe."

She stared. "You never went to school?" His eyes laughed. "Since when isn't that work?"

"You!" she exclaimed, and grabbed his hand. "Come on. I'll introduce you to my brothers—then we'll start for the movie."

She walked in, pulling him. Her brothers were coveralls smattered with grease.

"Hello, boys!" Edith said. "George—Carl. I want you to meet Jerry. Jerry Worden."

The boys lifted dirty hands. Jerry laughed. I wouldn't mind, but maybe your sister would. I'd be glad to next time."

On their way to the theatre he said, "They act like nice guys."

"They're always tinkering—far into the night, usually." Between her brows were the thin webs of a frown. "But what are we doing talking about them?" He looked at her. "What shall we talk about?"

She met his eyes, and saw how the moon tinted them a soft yellow. She pressed his arm closer to her, and was conscious of a deep pounding in her breast. She wondered if she were really falling for him.

"Let's talk about you," she said. "I know, you told me you were lonely. You said you didn't have any friends. You said maybe a girl is what you wanted, to sort of adjust you to the kind of living you think you needed."

"Well that's true. Anyway I guess it's true." A frown crossed his forehead. "Why bring that up now?"

Her heart was a painful beat. But she couldn't tell for sure. Love was intangible. You either had it or you didn't.

"You're not happy now," she said. "I guess I just don't appeal to you."

"You're talking crazy. How do you know how I feel toward you? How do you know that right this minute I don't feel like grabbing you up in my arms, holding you tight and kissing you like a guy never kissed a girl before? How do you know?"

"Look," he continued. "I never felt good until I met you. Get that through your head. You were all I needed to set me right. I know it as sure as I am born. Now, do you believe me?"

"I believe you," she whispered. A tear dropped upon her cheek.

THEY left the movie, had a milk-shake, and he walked her home. If they could always be together like this, she thought. It would be wonderful.

He kissed her at the door, a long, cherishing kiss—the kind she had wanted before. The kind she was hoping he'd give her. She went into the house smiling, and her fingertips were tingling stronger than ever now with that electrical feeling.

TWENTY minutes later the kitchen door opened and George came in. He was grinning triumphantly. He and Carl must have got the motorcycle fixed, she thought, and she smiled. Those kids!

"Hey, sis!" George said. "Get me

**DUO-CONTROL INSTRUCTION CAR**—A car with dual control is the idea of Robert McKinley, right, of Vancouver, to teach prospective drivers. The student can operate brake, clutch, accelerator and steering simultaneously, but the instructor has over-riding controls.

some lemonade, will you? For three?"

She stared at him. "Three?" "That's what I said," George said. "Carl, me, and your friend, Jerry. Boy, is he a mechanic—"

Trance-like, she poured out the lemonade, and handed it to George, who took it out on the tray.

She was sure of it, now. Jerry didn't come back to repair the motor-

cycle. The motorcycle was the path he took to return to her.

A soft smile played across her lips. She set the magazine face down on her lap, an drested her head against the back of her chair. She was looking at a fly creeping across the ceiling, but really, she wasn't thinking of the fly at all.

## WORLD HAPPENINGS BRIEFLY TOLD

Airplanes will be used to take 3,500 homing pigeons from Britain to Bordeaux for the first cross-channel pigeon race since 1939.

Workmen clearing out an ornamental pond at Watford, Eng., found a live hand grenade, a Bren-gun machine, bullets—and money.

The last working windmill in Kent, England, known as "The Little Old Widow of Deice", which has operated for 50 years, is to be destroyed.

At the time of his death, Booth Tarkington had a new novel two-thirds completed. His widow is undecided about disposition of the manuscript.

W. A. Dickenson of Leicester, England, has invented a process of making fire-proof bricks from a fine ash waste product from electricity power stations.

John L. Baird, 58, known in England as the "father of television", died in his sleep from what his physician called a complete physical breakdown following influenza.

DERBY, England—The long-established custom of distributing free loaves at Derby Cathedral on Sundays has been discontinued owing to the bread shortage.

A new company, Remind Me, Ltd., is all set to remind forgetful Britons of the things they ought to remember. It was founded by a man who forgot his wife's birthday.

Seventy-five per cent. of the readers of the Berlin Nacht Express would emigrate from Germany if given the chance, a referendum conducted by the paper among its readers indicated.

## A VALUABLE GIFT

The American Red Cross recently presented its Norwegian sister organization with a most valuable gift. Fixtures sufficient to equip the new hospital for feeble minded children soon to be erected in Oslo will be shipped from the United States in the near future. The gift includes linen, sterilizers, complete dental equipment, surgical instruments, washing machines, and a complete set of the most modern kitchen machines and equipment.

## Inventor Working On Gadget To Limit After-Dinner Speeches

A Chicago inventor with an eye to giving aid and comfort to suffering humanity has come up with a machine that regulates the length of addresses by after-dinner speakers. This is a great step forward. It is to be fondly hoped that the gadget not only is foolproof, but that the inventor sets to work immediately on the mechanical additions or adjustments necessary to improve the quality of speeches. Most habitual listeners, however, would settle for an attachment to tune out at any time. —New York World-Telegram.

## Man Who Claims Discovery Of Sea Lion Wants Credit

LONDON.—The man who claimed to have discovered that a sea-lion could balance a ball on its nose wants credit on his tombstone, his will revealed.

The naturalist, who died in December, asked that his epitaph be "Joseph Woodward, F.Z.S., naturalist, discoverer of latent equilibrist powers given to sea lion species."

The will left \$12,000 to three hospitals to endow beds for circus and variety performers and \$4,000 to the Salvation Army to give them Bibles.

**ON WAY BACK**

A house agent had a farm on his books which was supposed to be haunted, and to prove rumor wrong he decided to engage a man to stay there for one night.

The following day he was up early and went around to see how the man had fared. On the lawn he discovered the remains of a window sash and shutters completely wrecked, but of the watchman there was no sign.

Four days later the house agent came across him tramping along a country lane three miles away.

"Hallo, George!" he cried. "Where have you been all this time?"

The man wiped the perspiration from his brow. "Boss," he replied, "I've been coming back."

A smart man is one who possesses enough judgment to use his own.

**OUR COMPLETE SHORT STORY—**

**FATHERLY PERCEPTION**

By MARGARET ELSOM

Copyright  
Wheeler Newspaper Syndicate

WE HAD BEEN married about ten months when I said to Marie: "Darling, just how much do you think we could scrape up to buy a car—just a cheap one, any kind just so long as it goes?"

Marie was washing the supper dishes at the time, and me—well I was drying them for her, and I'm not hen-pecked either! I'm only too pleased to think that I have such a fine girl as Marie for my wife. Gee, but I love her. And here we are, working on a fruit farm, 50 miles away from our nearest relative, and six miles from the nearest town. Once a week we managed to get into town with Mr. Kayes (my boss). But when a man expects to become a father in two month's time he wants to make certain he has a definite way of getting to the hospital ahead of the stork.

Whenever I thought of the stork it sent the chills up and down my spine, and I envisioned it speeding through the stratosphere—or wherever storks do their speeding—and me, breathlessly trying to obtain transportation for myself and Marie. It wasn't a nice vision. In fact, it gave me "stork fever", and now as we're doing the dishes the lanky, feathered flying animal loomed closer than ever, and that was the reason why I had asked Marie about a car.

Marie sighed a little. "Yes, things sometimes happen before schedule. I think we could manage a cheap car, say around \$200.00."

I finished drying the Blue Willow cup—and also finished the cup's usefulness. Whenever I'm drying dishes, the tea towel seems to have a habit of getting mixed up in the handles of the cups, and when I go to set them down and pull the towel away, it doesn't come clear (that's the second cup I've broke in the last three days). It really gets a man down when he's expecting the stork.

There had been an ad running in the paper along these lines: "For sale, Model A, good running order, five good tires, motor recently overhauled. Ceiling price; Phone 264." Marie agreed it might do.

I threw the paper aside and went over to the telephone to ring the number, while Marie stood biting her nails. A squeaky little voice answered.

"Yup, this here's the place, Mister—car ain't sold as yet, she ain't, but she's likely right smart goin' to be. You don't see bargains a-carburatin' under your nose like this every day; no sir. She won't be settin' here long, no she won't, so you want to grab her right quick."

The man breathed and I had time to say, "How much?"

"Two and a half as she stands—right ready to exilerate down the home stretch—yes sir," he said.

I felt the concussion of the extra \$50 as I went through the ceiling, but I thought I might be able to bring him down a bit. I reached for my hat and coat and made a dash to catch Mr. Kayes, on his way into town to lodge meeting. I yelled to Marie, that I wouldn't be long, and to keep her fingers crossed. She looked so lovely, standing in the doorway, hugging the Persian cat, which we had called Donald, but which had to be changed to Donald. (I never was much of a farmer).

It happened that the owner of the car was a very old gentleman who thought that his rheumatism wouldn't let his leg move fast enough to "break" her when she needed it. He was slightly stubborn over the \$50, but I won out. In half an hour I was riding down the front street, proud as any expectant father. I felt I had obeyed my "premonition" to get a conveyance—and my heart sang. So excited was I that I pulled her over to the curb and went into the corner drug store to 'phone Marie.

"Darling," I said, "we are the owner of a \$200 automobile—and it runs." She sounded excited. "What's the matter—you're all right, are you?" I asked breathlessly.

"Oh, yes, dear," she said, "but hurry home—it's happened."

My heart ceased to beat, and the booth went all black for just a moment, but, pulling myself together, as an expectant father should. I told her to get right into bed. I would be home immediately. It had happened—and her all alone, and—at the telephone! Why it was impossible. But she said it had happened. Oh, the poor darling.

I jumped into the car, and raced around to Dr. Gillets. He was just changing a tire in his garage. I streaked across the lawn and pulled him toward my humble car, explaining what had happened. "I'll take you out, doctor—I'll take you out—never mind your flat tire—I'll run you out to Marie right away."

"But—but, my dear man," he said, "let me at least get my bag."

He rushed to the house, coming out again in two seconds flat. Jumping in the car, he asked, "Did you say she answered the 'phone?" "Yes, doctor—yes—yes, and I told her to get right back into bed. I'd be right out."

"Incredible," he mumbled, "incredible."

"Will that hurt her?" I pleaded.

"Will what hurt her?"

"Incredible?" I said. And still don't know why the Doctor grinned. Well, the old car snorted up the hills, and back-fired down them. Leaning heavy 'round the bends, she ticked off the six miles quick. A cow got in the way once. I pressed the horn button, and it went. "Br-r-r-pp," and unthinkingly I said, "excuse me."

Looking back, on that evening, I sure feel like the fool that I was. As long as I live, I'll never forget the scene when we opened the door. There was Marie, on her hands and knees, over a cardboard carton which held Donald and five newly-born kittens!

I had to wait six more weeks before I became a father!

**SELECTED**

**RECIPES**

**FISH—FRESH OR FROZEN**

Fish is a menu favorite whether caught by the amateur angler or chosen from the stock of fresh or quick frozen varieties. Its popularity is well deserved, too, from the point of view of food value and variety.

Take mackerel for instance. Research shows this fish to be a good source of three important B vitamins as well as good quality protein. Mackerel contains considerable fat and for that reason is best baked or broiled.

One of the most delicious and one of the simplest ways to prepare small fresh fish or fillets of large types, is by oven frying. This method cooks the fish quickly and gives it that crisp golden crust about which gourmets rave.

**Oven-Fried Fish**

1 pound fish fillets  
1 cup milk  
1 tablespoon salt  
4 cups corn flakes  
4 teaspoons cooking oil  
Dip fish in salted milk, then in finely crushed corn flakes. Arrange on well-oiled baking sheet. Sprinkle with oil. Bake in very hot oven (500 deg. F.) 12 to 15 minutes.  
Yield: Four 4-ounce servings.

**Boiled Mackerel**

3 to 4 pounds fish  
1 teaspoon salt  
1 teaspoon paprika  
2 tablespoons melted butter  
Have whole fish split and cleaned. Wash thoroughly and wipe with a cloth. Mix salt and paprika with melted butter and brush over fish. Place fish skin side down on greased broiler rack. Broil 2 inches from heat about 10 to 15 minutes, until brown and flesh flakes when tried with a fork. Serve at once with sections of lemon. Yield: 6 servings.

We're always hearing about these "zero hours", in various disputes. It's a good name, because nothing happens at those hours.

**Soothe your irritated eyes with Murine**

**Put 2 DROPS in each eye!**

Are your eyes sensitive to strong lights? Then cleanse and refresh them with Murine. And use Murine when eyes are irritated by sun-glare, dust, driving, reading, hay fever or factory fumes. There are seven important ingredients in Murine. Two drops in each eye soothes and comforts very quickly. Ask your druggist for Murine.

**SMILE AWHILE**

"Yes, my wife gets more out of a novel than anybody."

"How's that?"

"Well, she always starts in the middle, so she's not only wondering how it will all end, but how it began."

"Your wife is a very sympathetic woman, isn't she?" asked Robinson.

"Yes, very," replied Smith. "She works on the theory that you can find whatever you want when you don't want it by looking where it wouldn't be if you did want it."

Two actors, both jealous of each other, met in the Strand.

"Hullo," said one. "How are you getting along?"

"Not so badly," said the other; "keeping alive."

The first man eyed his rival for a moment, then asked casually: "What's your motive?"

The two survivors of a shipwreck, a seaman and a stockbroker, had clambered on to a raft.

"If a ship doesn't sight us soon," said the seaman, "we'll starve."

"Don't talk nonsense!" snapped the stockbroker. "I've got plenty of money."

An Aberdonian, living alone, had an early morning train to catch. Being a heavy sleeper, he was afraid he would not wake up in time. Several possibilities presented themselves, but every one meant a tip.

In the end, he addressed an envelope to himself and posted it without a stamp.

Early next morning there came a thunderous knock on the door. The Scot climbed out of bed and opened the window.

"Here's a letter for you," called the postman. "Fivepence to pay."

"Tak' it back," commanded the Aberdonian. "Carelessness like that doesn't deserve to be encouraged."

The insurance office was called by an excited woman.

"I want to insure my house," she said. "Can I do it over the phone?"

"I'm afraid not. Perhaps we'd better send a man along."

"I've got to do it immediately, I tell you," came the frantic voice. "The place is on fire!"

"According to the law of supply and demand"—began her husband, who liked to explain things.

"No one demands anything at a store now, dear," she interrupted, "it's the law of supply and request."

"What was it you wanted to tell me?" asked the boy on furlough.

"Oh," said the girl, "it was just that mother last night asked me to ask you if you wanted to ask my father anything; he's going out of town tomorrow."

An Irishman wanted to take his donkey by train, so when he got to the station he asked where he should put it.

"At the back of the train, the stationmaster told him.

The Irishman then got into his carriage and after about an hour's travelling he asked a fellow-passenger: "And how fast might we be goin' now?"

"About sixty miles an hour," he was told.

"Begorra!" he exclaimed. "My Neddy must be steppin' out!"

After examining the proofs of his portrait, the customer got angry. "Do you call this a good likeness?" he stormed. "Have I a squint? Do I look like a prize-fighter? I ask you, do you think I look like this picture?"

The photographer, timid and tactful, replied:

"The answer, sir, is in the negative."

**CANADIAN WINS CAMBRIDGE HONORS**—Completing studies in one year which normally require two years at Cambridge University, England, Harry G. Johnson, Toronto, passed his Part II Tripos with first class honors.

**Two For One**

By ANNE ADAMS

A darling duet this frock and panty set! Pattern 4612 buttons down front for easy wearing and ironing. Two versions: for playtime; for dress-up. Panties may match.

Pattern 4612 comes in sizes 2, 4, 6, 8. Size 6, puff sleeved frock, takes 1 1/2 yards 35-inch fabric.

Send twenty cents (20c) in coins (stamps cannot be accepted) for this pattern. Write plainly Size, Name, Address and Style Number and send orders to the Anne Adams Pattern Dept., Winnipeg Newspaper Union, 175 McDermot Ave. E., Winnipeg, Man.

The bayonet was named for the city of Bayonne, France, where the weapon was developed in the 17th century.

**"DAYLITE" DUST**

A specially developed and highly effective fungicide for daytime dusting on potatoes, pumpkins, cucumbers, tomatoes, melons, sugar beets and squash. Does not require dew to complete its reaction. Contains 7% metallic copper content with tri-basic copper sulphate as the active ingredient.

### EXPORTS LOST BY FIRE

Forests represent pulpwood, the raw material of Canada's largest export industry. Canadians should be their own fire wardens.

### HUGE PAPER CONSUMPTION

Canadians consumed 244 lbs.

of paper per person in 1944. U. S. consumption was at the rate of 286 pounds per person.

We "muddled through" the war of arms but if we muddle in the war of ideas we are through.

★ Want Ads are black and white—but read all over.

### FORTY CAR DRIVERS' LICENSES SUSPENDED

Forty drivers' licenses have been suspended in Alberta this year for various causes according to information received from the provincial secretary's department.

During the whole of last year, the number suspended was 68.

Provincial legislation provides that magistrates shall have power to suspend drivers' licenses when a conviction has been made for violation of the law and such a course appears desirable in the circumstances.

In many of the cases, the drivers had been found guilty of reckless driving or similar infringements of the statute.

The AMA has emphasized the need of observing safe driving principles and create a greater interest in safety education.

### Hunting Regulations Announced

The minister of mines and resources, Ottawa, has issued the regulations regarding migratory birds for the current year.

#### Open Seasons—

Ducks, Geese: From one half hour before sunrise September 14 to one half hour after sunset November 28.

There is a closed season throughout the year on Eider Ducks, Wood Ducks, Swan's, Ross' Goose, all shore birds except Wilson's Snipe and all migratory non game and insectivorous birds.

Migratory game birds killed during the open season may be possessed in Alberta at any time, but the onus of proof that birds possessed were lawfully killed shall be on the person having the birds in possession.

#### Bag Limits—

In any day: Ducks 15, of which not more than 8 shall be species other than Mallards; Geese 5; Coots and Rails 25; Wilson's Snipe 5.

In any open season: Ducks, 150; Geese 25; Rails and Coots 100; Wilson's Snipe 100.

No one shall have in his possession at any time more than 60 ducks.

### Poultry Notes

Pullets on range should be so fed and managed that they will reach the age of approximately six months before production starts. This allows proper body development to withstand the strain of heavy laying. Egg production at an early age causes an abnormal number of small eggs and heavy mortality. When pullets are put into the laying house conditions in the house should duplicate range conditions as nearly as possible for a short time at least. Continue to feed growing mash until production reaches around 40 percent then change gradually to laying mash. A continuous

### FIRE DESTROYS JOBS

A forest fire not only destroys  
valuable timber, it may also  
force mills to close down and  
put people out of jobs. Playing  
safe with matches and fire in  
the woods help prevent forest  
fires. Fires are started by  
thoughtless people.

### MANY USES FOR WOOD PULP

Wood pulp, of which Canada  
is world's second largest pro-  
ducer, is used for making paper  
building board, plastics, rayon,  
vanillin and explosives.

★ Want-Ads—the little fel-  
lows with a big pulling power.

### Unfit Milk and Cream Cans

Dairy Branch officials of the  
Alberta department of agricul-  
ture report excellent co-opera-  
tion from farmers and dairy  
plants in the campaign to dis-  
courage the use of faulty con-  
tainers.

There are four classes of con-  
tainers being condemned—

1 Cans which have very rusty  
inside:

2 Cans with split or open in-  
side seams which allow milk  
and cream to lodge and putrify:

3 Cans in which the coating  
of tin is badly worn exposing  
the contents of the can to the  
bare iron.

4 Containers which are con-  
structed of very light material  
poorly tinned and with loose  
covers.

Containers with any of these  
failings should not be used for  
either milk or cream. Even  
with the best care in washing  
such cans any milk or cream  
poured into them starts to  
spoil as soon as it comes in con-  
tact with the rust, bare iron or  
split seams that usually con-  
tain billions of bacteria. The  
grade is lowered and there is  
a corresponding reduction in  
selling value. At the same  
time the dairy plant must turn  
out a product which is not of  
top quality.

A provincial reputation de-  
pends essentially on the inter-  
est taken by producers in ship-  
ping high quality raw milk and  
cream to dairy factories.

### STOP WASTE OF WEALTH

Canada's forests yield a per-  
petual harvest of wealth, until  
destroyed by fire. Helping to  
prevent forest fires is a duty of  
every Canadian.

By  
Dr. F. J. GREANEY

Director,  
Line Elevators Farm Service,  
WINNIPEG, Manitoba

Farming Is A Business

In Western Canada, today farm-  
ing is a business, and if a farmer  
is to make a success of it, it must  
be based on business principles. It  
may have been unnecessary for the  
prairie farmer of 40 years ago to  
keep books, but today it is a dif-  
ferent story.

The modern farmer has a greater  
capital investment than had his  
predecessor. He borrows more  
money, and risks more money and  
credit; he buys more expensive  
machinery and equipment; his  
operating costs are higher; and soil  
fertility is lower. The chances of  
his making wrong decisions, which  
may lead to severe losses, are there-  
fore much greater. In these cir-  
cumstances it has become imperative  
for the farmer to develop the effi-  
ciency of his farming by every  
means available to him.

Many activities of the modern  
farmer contribute to the efficiency  
and success of his business. One of  
the most important of these is the  
keeping of accurate and fairly com-  
plete farm accounts. A business  
without bookkeeping may be com-  
pared to a watch without hands.  
It may go, but there is no way of  
telling how well or how badly.

If farm accounts are properly  
kept and analyzed, they will eventu-  
ally lead to a better understanding  
of the whole farming enterprise,  
and in this way to continual im-  
provements, greater efficiency and  
higher profits. Farmers will be  
amply rewarded for the time spent  
on keeping books.

A farm account book, especially  
adapted to the keeping of simple  
records, can be obtained, free of  
charge, from any Line Elevator  
company or agent, or by writing to  
Line Elevators Farm Service,  
Winnipeg or Calgary.

### THE WORLD OF WHEAT

By H. G. L. STRANGE

Order Good Seed Now

The Crop Testing Plan this  
last winter and spring distribut-  
ed to farmers just over 40,000  
bushels of registered and cer-  
tified cereal seed sealed in the  
sack.

In the wheats, Thatcher was  
far and away the variety in  
greatest demand, followed close  
ly by Red Bobs. Then came Re-  
gent which year by year is  
showing an increase in popular-  
ity. There was a greater de-  
mand for Garnet than for many  
years past.

With the oats, as usual Vic-  
tory was far in the lead, follow-  
ed next with substantial quanti-  
ties of Ajax, the new production  
of our rust research laboratory  
at Winnipeg. Ajax, therefore, is  
a variety worth watching.

With barley, OAC 21 as usual  
was far and away the great-

est demand. The next variety  
in popularity being Plush and  
then the new stiff strawed feed  
barley Titan, which also is  
worth watching.

Many farmers, unfortunately,  
who wanted registered and cer-  
tified seeds, were disappointed  
because they sent in their or-  
ders too late, and the supply last  
year was quite limited.

My most earnest advice,  
therefore, to farmers who have  
made up their minds that they  
require better seed next year is  
to place orders for registered  
and certified seed as early as  
possible this fall so as to be  
sure of early delivery next year.

## Farm Problems In Britain

MORE THAN A YEAR has passed since the war in Europe ended. At that time there was expectation of an early relaxation of wartime controls and of other demands which had been made on the people because of the urgent needs of the times. World conditions, however, have been slow to improve, and in the case of food the situation has become increasingly critical. Farmers everywhere are being called upon to help in this emergency, and there has been little relief for them from the pressure of the war years. A recent article published by the British Ministry of Information tells of the ways in which farmers in Britain are being called upon to meet the present food situation. The article says in part: "In wartime the food policy in the United Kingdom aimed to provide as adequate a diet as possible for the human population, while restricting to the maximum extent practicable the strain upon merchant shipping tonnage. In carrying out that policy, it was essential that there be full control of supplies at every stage from producer to consumer. Thus the utilization of land, the proportion of grass and tillage, the crops grown, the disposal of crops, purchases of feeding-stuffs, and the marketing and slaughter of livestock were all brought under strict control."

### Made To Grow Certain Crops

"Farmers were made to grow wheat, potatoes, sugar beet, and other crops for human consumption to an extent dictated by the nation's needs, and, having grown the crops, farmers were not allowed to use any of them for feeding to livestock, with the exception of portions that were judged by Government agents to be unfit for human consumption. The maximum proportion of tailings and screenings which could be used by the producer was fixed by law. Farmers were not only forbidden to feed to their livestock any crops suitable for human consumption, but were also forbidden to sell either bread grain or fodder to any purchasers other than merchants approved by the Ministry of Food. These sales of fodder grains, together with the oilseed cakes, wheat offals, and other by-products of oilseeds and grain imported for human consumption, constituted a pool out of which supplies were rationed to essential livestock. This resulted in drastic decreases in the numbers of pigs and poultry kept by farmers, but it also allowed increased grain supplies for human consumption. With peace came two main relaxations: the abolition of compulsory directions for wheat growing, and an increased allocation of foodstuffs for pigs and poultry. But, now, a year after the end of the war in Europe, Britain has reimposed or is about to reimpose both of these restrictions. Farmers have not been released from their obligation to sell all the millable grain and edible potatoes that they grow, and sales of fodder grains still have to be made only to approved buyers, so that the total supply can be kept under control and directed to the livestock which it is most desired to maintain in order to maximize food supplies to meet the world food crisis."

### Fights Famine With Intensity

"It has been decided to increase the acreage of wheat for harvesting in 1947 to 34% above the pre-war average, and to reintroduce compulsory cropping orders. Stocks of bread grain on farms and in stores, together with the imports that the United Kingdom Government expect to receive before next harvest, will barely suffice to provide a supply of flour and bread comparable to that of wartime, and if arrivals of wheat fall short of expectations, it will be necessary either to reduce consumption, or to increase the rate of extraction, which will necessitate a further cut in rations of feeding stuffs for livestock, and will also lower the food value of the reduced volume of rations. Thus, for the remainder of 1946 and during the production year 1946-1947, the full rigour and intensity of the United Kingdom wartime food programme will be reinstated, in order to secure the maximum possible output of food for humans. Apart from the fact that United Kingdom farmers and farm workers are tired, and that a good deal of their farm machinery needs replenishing at a time when dollars cannot be spared to buy new American machines, a good deal of labor has been lost through the repatriation of prisoners of war and the demobilization of many in the Women's Land Army. Notwithstanding these disheartening conditions, it is quite clear that the United Kingdom farmer is going to fight the famine with the same intensity with which he fought the war."

### Do you suffer MONTHLY FEMALE PAIN?

This fine medicine is very effective to relieve pain, nervous distress and weak, crampy, "dragged out" feelings, of such days—when due to female functional monthly disturbances. Also fine tonic!

**LYDIA E. PINKHAM'S VEGETABLE COMPOUND**

### GEMS OF THOUGHT

#### MOTIVES

It is motive alone that gives character to the actions of men.—Bruyere.

He that does good for good's sake, seeks neither praise nor reward, but he is sure of both in the end.—William Penn.

Right motives give pinions to thought, and strength and freedom to speech and action.—Mary Baker Eddy.

The morality of an action depends upon the motive from which we act.—Samuel Johnson.

In the works of man as in those of nature it is the intention which is chiefly worth studying.—Goethe.

The measure of a man's real character is what he would do if he knew he would never be found out.—Macaulay.

Peaches were introduced into England from Persia in 1562.

### GETTING TO IT

#### Science Making Attempt To Find Cure For Common Cold

At last science has declared war on the common cold.

The test-tube wizards have long been fighting their endless feud with cancer, tuberculosis and heart disease, but this is the first time they have attempted an all-out blitz on coughs and sneezes.

The United States National Institute of Health has announced that early in July it will open its campaign to discover prevention and cure for civilization's greatest and most irksome time-waster.

Dr. Rolla Ryer, institute director, discloses that a research team will be assigned to the program, which will last at least five years. Key researchers will be a medical officer, a research expert specializing in viruses, an epidemiologist and possibly a bio-chemist.

Their first task will be to isolate the cold virus or, if there are a number of different viruses, causing a variety of colds, to isolate each type of virus. When this has been done the researchers will go to work to develop a vaccine which will provide immunity against colds.

For the first year of investigation the researchers have been allotted \$50,000. This sum is negligible when it is realized that in the United States alone colds every day keep 250,000 workers away from their jobs. And if the project is a success the relief in human misery will be incalculable.

By 1950, hazards the Vancouver Province, we may look forward to clearing out the cold remedies from the medicine cabinet. In the meantime we may as well keep our fingers crossed, stay out of drafts and stow a handkerchief in our pocket.—St. Thomas Times-Journal.

**PIANIST, 15, TO PLAY WITH PHILHARMONIC**—Philippa Duke Schuyler, youthful musician, who was 15 on Aug. 2, makes her debut with the Philharmonic Symphony orchestra in New York. Daughter of a Negro journalist, she will be guest pianist in the Saint Saens G-minor concerto. The orchestra will play one of her original compositions during its program.

### Cause Of Accidents

#### One Bad Habit Of Drivers Is Responsible For Many

On the basis of one insurance company's experience, almost a quarter of all automobile accidents could be prevented by elimination of one bad habit of drivers. A study of 3,500 accidents, summarized in the Weekly Underwriter, showed that about a quarter of them resulted from failure to reduce speed properly in approaching blind intersections in streets and highways.

Many automobile drivers who were in accidents were found to have one or more bad driving habits, but the one most frequently found was the failure to make allowance for opposing traffic at blind intersections.

Many bad driving habits are capable of correction and it should not require an accident to eliminate them—or the drivers who possess them. Those who approach intersections with care and at moderate speed are only going on the reasonable assumption that there is traffic on the other road, too.—New York Sun.

Alexander the Great was born in Macedonia in Europe, died at Babylon in Asia, and was buried at Alexandria, in Egypt.

### Sunburn

For quick relief of Sunburn, Prickly Heat and Chafing, use **MENTHOLATUM**. Jars and tubes, 30c.

**MENTHOLATUM** Gives COMFORT Daily

Kellogg's Bran Flakes are delicious. In a recent survey Canadian housewives voted Kellogg's 3 to 1 favorite over any other brand.

## Make this 30-day test!

1. If you're really ill, see your doctor! But if you just feel dull and head-achey, you may only be suffering from incomplete elimination. Especially if you're over 35. Here's how one simple change of diet can help you keep fit!

2. Start now to eat Kellogg's Bran Flakes every morning. If you want to keep feeling fit the natural way, get more of the "bulk" your system needs by eating delicious, gently-laxative Kellogg's Bran Flakes With Other Parts Of Wheat.

3. Just thirty days should prove to you how grand it is to feel alert, to have the energy for all the extra things you'd like to do. You'll want to go on keeping fit the Kellogg way!

Bran Flakes, Pep, Corn Flakes, All-Bran, Rice Krispies, Krumbles and All-Wheat are all made by Kellogg's, the greatest name in cereals.

**SAVE TIME...SAVE FUEL...SAVE FOOD!**

### The Coming Age

#### Will See More And Varied Products From Plastics

The makers of plastics held an exposition in New York to show how many things they had devised from their products. On display were:

Plastic bugles and trumpets which require no warming up. Also a string orchestra, with all instruments of plastics.

Golf clubs made of molded nylon; a plastic boat; a horse with a plastic saddle. (The horse was of the old-fashioned sort.)

Plastic wallpaper on which Junior can scribble without getting scolded, and a plastic gown which cannot be stained by a spilled cocktail—you just rub it with a damp rag.

A \$30 toy which manufactures on demand little plastic toys, such as buildings, horses, cowboys.—New York Herald Tribune.

### Under Some Conditions

#### Over-Exertion Even In Simple Games Can Be Dangerous

The Wichita Falls, Texas, man who put so much energy into a demonstration of his favorite golf swing that he broke both legs in the effort, really gave a demonstration of how dangerous over-exertion can be. Professional athletes talk now how easy it is to injure or break an arm or a leg by a sudden twist of these members. Golf is not regarded as the most strenuous of games, but the above circumstance indicates it can become so under certain conditions. All anyone has to do to find out how easy it is to get "out of condition" is to resume some work or game that has not been participated in for some time. The sensible thing to do is avoid exerting oneself to the limit, keeping in mind one's age and physical condition.

### Defacing Books

#### Is Strictly Against Library Rules But People Do It

Books owned by oneself may be marked just as much as the owner likes; but it is an impertinence to make notes on books owned by the public and loaned from the public library.

Every so often one gets a book profusely marked with passages underlined. There is someone who seems to take a delight in recording his opposition to the teaching given in some books. That the notes are futile and often foolish is beside the mark; it should not be done.

Everyone who borrows books from the library, has a right to get them fresh and unsoiled by foolish marginal notes, or underlinings. Apart altogether from the ethical side of the case, it is against the rules of the library to deface books.—Guelph Mercury.

### NEW DRESS UNIFORM

Britain's peacetime army is to have a new ceremonial and walk-out uniform. The dress committee of the war office announced that it will be of blue serge with a stand-up collar fastened at the front like the old patrol jacket uniform.

The lower fringe of the northern lights are about 50 miles above the earth. 2634

### "A1 Quality"

### Beyond The Horizon

#### There Is Always The Unfolding Of New Lands

Wherever one may be, there is always a horizon, the boundary of the world one sees, the line where earth and sky would seem to meet.

A city presents a disorderly skyline—spires, apartment houses, and office buildings crowded pell-mell—but nature's myriad skylines are peace and majesty, whether it be rolling hills, blue line of sea, feathered edge of forest or towering mountains.

As the wanderer moves, his skyline moves, and as certainly as there is always a horizon, there is always a beyond. The unknown lying beyond the horizon has tempted the seer since the beginning of history. It has lured men into rough seas and bleak wildernesses.

In his long journeying no traveler ever reached the horizon. It lay forever beyond his grasp, a tantalizing line on the rim of the sky, extending mute challenge.

There is, one might think, a hint of the eternal in the horizon and a hint of infinity in the beyond. The promise of the skyline is not barren. Always there is the fulfillment—the slow unfolding of new lands.—Montreal Gazette.

The diamond got its name from the Greek "Adamas", meaning the unconquerable.

## Plans Have Been Made For Canada's Post-War Army To Ensure Our Future Security

THE following is the text of a speech prepared by a senior western military officer on the post-war Canadian Army: The Government has announced that Canada will maintain her Defence Forces during this period of peace. We felt that most business men have had little time to study the press releases about the plans for Canada's post-war defence forces, and that a short comprehensive talk might help to clarify the situation. With this in mind, we have arranged a series of lectures to businessmen's organizations throughout the prairie command, and this is one of those lectures.

Since I am not qualified to speak about the Navy and Air Force, I am going to tell you about the post-war Army only, with particular reference to the future plans for the unit's in your community.

In order to provide the background for the plans for the post-war army, first, let me tell you something about the army as it was in pre-war days. There are relatively few people in Canada who fully realize the difficult days which our pre-war permanent force and the Non-Permanent Active Militia encountered during the days of peace between the two great wars. Some people in this audience may remember however, the NPAM drilling with wooden guns, and having a squad of four or six men represented on the ground by two men, each holding on to the end of a long rope. Some may remember also NPAM soldiers bringing their uniforms on parade, wrapped in a brown paper parcel, changing into uniform for parade and back into civilian clothes before they went home. It is a shameful thing to say, but in many towns NPAM soldiers were scoffed at and ridiculed by the general public for being in uniform at all, so that they did not wish to be seen in the King's uniform.

In spite of the stumbling blocks placed before these soldiers by an apathetic public, they did carry out a marvellous job. They continued to prepare themselves for the defence of their country, and finally in Sept., 1939, when we found ourselves at war, there was a small nucleus of partially trained men in every community throughout the country. It was around these NPAM nuclei, that the units of our magnificent Canadian Army were built. The spirit and endurance of these men in the NPAM deserve great praise from all Canadians, and we should be thankful that there were some men in Canada who were far-seeing enough to realize that there was a possibility, and that trained troops would be required in the future.

In spite of their magnificent effort, the personnel of the NPAM were at best only partially trained in Sept., 1939. They had been lacking in modern equipment, units were well below war strength in personnel, and the paltry financial allotment was not in any way sufficient. Barring the operations at Dieppe in 1942, it was not until July, 1943, that a complete formation of the First Canadian Army went into the field in battle. Three or four years is a long period of time to allow a country to organize and train its fighting formations. It is strange that a progressive country like ours should have allowed itself to sink into such a pacifistic state to be totally unprepared for a major war, as we were in 1939. We were extremely lucky that other parts of the British Empire had some trained troops available, which could provide the defence whilst we were organizing and training in Canada and the United Kingdom. If it had not been for the troops of other countries, perhaps the final outcome of this last war would not have been favourable to the allies.

If we are not convinced that it is necessary for us to maintain an army during the peace period, the next question for us to decide is whether it is necessary for us to have large numbers of ground forces in our post-war army. Let us examine the problem in detail. It is an old established principle of war that is equally applicable today as it was thousands of years ago, that ground must be actually occupied by ground troops before it can be said to be in the possession of those troops. This is a so-called atomic age, but atom bombs and other aerial missiles are only the means toward an end. They are used to soften up defences and disrupt communications and to pave the way for ground forces who are going to occupy the ground. In defence, we might use the example of your local city or town, and say that if an aggressor nation wished to capture that particular city or town, that nation could be subject to a powerful bombardment of high explosive weapons. Our defending force would be scattered, and communications would be disrupted, but the city

or town would remain in our possession until we were forced out by ground troops of the aggressor nation.

Have I persuaded you now that we need ground forces in our army even in this atomic age? If I have, the next question for us to discuss is how should our army be composed. Military forces cost money; naturally they cost more in war time than they do in peace time, but in peace time they send in sizeable bills too. It is we taxpayers who must foot the bills for our army. If we cannot immediately justify this expense, we might be more inclined to do so if we considered our defence forces as Canada's National Insurance Policy for our Security. The premium for this policy in the shape of a small proportion of our taxes is amazingly low for the coverage which the policy gives us.

Since we are paying for the upkeep of the army, we must insist that it is worth the money that we are putting into it. The army must be efficient in all respects and must be composed of young energetic soldiers who are putting a full effort into the service of their country. The government has issued a statement concerning Canada's post-war army. They have outlined a policy which envisages a relatively small Active Force (employed on a full time basis), and a large Reserve Force of part time civilian soldiers. There is only one Canadian army with two branches, one the active force and one the reserve force.

Service in the army will be on an entirely voluntary basis. The very highest calibre of young Canadians will be admitted into the army. The Active Force educational requirements for officers has been set at a university degree, and for other ranks it is junior matriculation. The army will be streamlined to take its place in modern times. There is an abundance of first class equipment which has been left over after the last war, and which is still the latest thing. This equipment will be issued to units of both active and reserve forces on a liberal scale, and further than that, continued research and development into new fields of weapons and equipment will be made. As new weapons and equipment are constructed, tested, and proven sound, they will be issued to units to replace that which they hold. . . .

As I mentioned before, the Active Force is to be relatively small. Actually it is proposed to maintain an active force of 25,000 personnel, which is a large increase over the pre-war 5,000. The active force will be composed of the various headquarters establishments, training establishments, and maintenance units, but the main striking force of

A LUCKY PET TO HAVE COMPLETE WARDROBE—"Nippy" boasts of a complete wardrobe and rides around Buffalo, N.Y., hauled by her mistress, Mrs. James E. Clancy. In winter, the pet rides in a sleigh.

### Enduring Beauty

7278

by Alice Brooks

Simple linens will be treasured when you embroider them in lovely lasting cutwork. They will look lovely and last forever.

These motifs so effective in cutwork can be done in plain embroidery. Pattern 7278 has transfer for 14 motifs 2 x 2 to 4 x 15 inches.

To obtain this pattern send twenty cents in coins (stamps cannot be accepted) to Household Arts Department, Winnipeg Newspaper Union, Man. Be sure to write plainly your Name, Address and Pattern Number.

### Lived On Grease

Cat Travelled In Packing Case From England To Africa

This is the story of "Panther", the cat which travelled to South Africa from England in a packing case and lived, almost literally, for six weeks on the "smell of an oil rag."

A new aircraft engine, swathed in heavily tarred paper and packed in a strong wooden box, arrived at a South African training school from Britain.

When the mechanics opened the packing case they were astonished to find a scraggy black cat with a white chest lying beside the engine. Its only sustenance during the six weeks' voyage had been the grease on the engine and the tarred paper. It became the "erks" pet.

### ELECTRIFY PARIS ROAD

PARIS.—Work has begun on electrifying 320 miles of railroad line from Paris to Lyons, at a cost of \$25,200,000.

the active force will be a brigade group of between 5,000 and 6,000 personnel. As before, the Reserve Force will be the predominant portion of the Canadian Army, and should we be forced to again mobilize, we will have to rely on these citizen soldiers all across the country. The Reserve Force will be large—it is intended to recruit 180,000 part-time civilian soldiers in the various units which have been localized in every major centre across Canada.

## The Intriguing Story Of A Fabulously Rich Gold Mine For Which Miners Sought In Vain

(From an article by Senator D. E. Riley Of High River, Alberta, in the Alberta Folklore Quarterly)

THERE is a fascination in stories of lost mines and lost men. There is the famed McLeod Mine somewhere in the heart of the sawtoothed Nehannies, for which men have searched for 40 years only to have it elude them and leave a trail of bleached wolf-gnawed skeletons behind. And then there is the famed Lost Lemon Mine of Southern Alberta for which prospectors have sought through the years in vain.

In the Spring of 1870 a party of prospectors left Tobacco Plains in Montana to prospect the North Saskatchewan River for gold. Among them were two men, known as Blackjack and Lemon. Blackjack had the reputation of being the best prospector in the West since he was the real discoverer of the Caribou diggings in British Columbia. These two men were staked by Lafayette French, an oldtime Indian trader and buffalo hunter.

Leaving the Saskatchewan party they decided to travel south with a large half-breed band headed by La Nouse which would afford them protection against hostile Blackfeet. Finally the parties split, the two prospectors following an old Indian lodge-pole trail up High River towards Tobacco Plains while La Nouse headed for Stand Off. As they proceeded Blackjack and Lemon found likely showings of gold in the river. Following the mountain stream towards the headwater they discovered rich diggings from grass roots to bedrock. They sank two pits and in bringing their cayuses in from the picket line they accidentally discovered the ledge from which the gold came.

Traders who saw samples of this rock at Fort Benton described it as resembling a body of solid gold with a little rock shot into it. It was indescribably rich!

In camp that night the two prospectors got into an angry argument as to whether they should stake the find and return in the Spring or camp right there, which almost led to blows. After they had rolled themselves in their blankets, Lemon stealthily crawled out, seized an axe and split the head of his sleeping partner.

Overwhelmed with panic, when the realization of the enormity of his crime penetrated his befuddled brain, Lemon would have fled the spot, but was afraid to leave till daylight. Instead, he built a huge fire and with his gun beneath his arm strode to and fro like a caged beast till dawn. Little did he think that two snaky, black eyes had witnessed the entire tragedy from the cover of the surrounding bush. Two young Stoney braves, William and Daniel Bendow, had trailed the pair, had watched them sink the holes and seen the discovery of the gold.

With the first streak of dawn Lemon mounted his cayuse and hit the trail across the mountains. Meanwhile the two Stoneys ransacked the camp, took the two remaining cayuses and set out for the Stoney village at Morley where they reported all they had seen to Chief Bearpaw. Fearful lest the whites hear of the goldstrike and over-run their game-filled hunting grounds, the old chief swore the young men to everlasting secrecy.

Since that day many attempts have been made to bribe them by prospectors in search of the Lost Lemon Mine. Bands of horses, herds of cattle, small fortunes to these children of the plains, have been offered them in vain, yet their tongues remained sealed.

When Lemon arrived at Tobacco Plains he confessed his crime to the priest, an old friend of his. He had with him the gold they had found on the day of the killing, as well as a sample of the rock they had discovered; but he seemed half-crazed from the recollection of his crime.

Promptly the priest despatched a half-breed mountain-man named John McDougall, to the scene of the tragedy. McDougall found the spot, buried Blackjack, reared a mound of stones over the grave to keep off prowling wolves, and returned to Tobacco Plains. No sooner had he left than Bearpaw's braves tore down the mound of stones, scattered them piecemeal and obliterated the trace of murder. How well they did their work is indicated by the fact that through succeeding years, the secret has remained so well hidden that the spot has yet to be re-discovered.

All that Winter Lemon remained with the priest, on the borderline of insanity. Meanwhile word of the rich find had spread far afield, and as soon as it was possible to travel in the Spring a large party of miners,

guided by Lemon, set out to re-locate the mine.

But fate was against them. Though Lemon scoured the gulches and hill-sides he declared he was unable to locate the spot, only to be accused by the angry miners of deliberately misleading them. In the heated quarrel that ensued, Lemon, threatened with death at the hands of the angry men, suddenly became violently insane.

He went to his brother's ranch in Texas where he lived many years having lucid intervals, but never fully recovering his reason.

Next year the priest outfitted a party from Tobacco Plains. The leader was to be the John McDougall who had buried Blackjack. McDougall, who was over at Fort Benton, was to meet the rest of the party at Crow's Nest Lake, and they were to proceed north from there. McDougall left Fort Benton to keep his appointment, but at Fort Kipp, a notorious whiskey-post, he drank himself to death.

The following year still another party was equipped and reached the lake where mountain fires burned all the grass and timber forcing them to again abandon the enterprise.

Next Spring the priest sent out a smaller party under the guidance of Lemon. But proximity to the place of tragic memories again unsettled the man's addled mind, and the party was forced to take him back.

Finally Lafayette French arrived at Tobacco Plains determined to unlock the secret of the hoard of hidden gold. In the vastness of the hills he was overtaken by a strange sickness and dragged himself back to Tobacco Plains more dead than alive. Some strange hoodoo seemed to haunt all those who sought the lost mine.

For the next 15 years Lafayette French continued to devote himself unswervingly to his self-imposed task.

The hoodoo that had haunted French continued to dog his footsteps to the very last. In a fire of mysterious origin that destroyed the Emerson House on the night of his return from his last unhappy expedition, he was terribly burned. On the same evening, he had written a letter to a friend at Fort Benton and posted it at the Bar U Ranch. Evidently it was written in a state of exaltation and excitement. He had at last, he said, located it and was coming to High River in a couple of days to tell him everything and enlist his help.

On his arrival he was unable to talk before he died, so if he had actually solved the problem which had occupied so many years of his life, the secret died with him.

Numerous attempts have been made since that time to relocate the mine, the most notable one as recently as 1929. Many there are who say that nothing will be found east of the mountains, but geologists designate a tract of land between Crow's Nest Lake and Mist Mountain, on the headwaters of the Highwood river, as a disturbed area in which precious metals might be discovered.

If one were to believe the stories that have drifted down from the early days, the search for this hidden Eldorado has claimed more than Blackjack's life. There is the story of a white man's skeleton found in the gap of the Old Man River, the bony fingers still clutching a bag of gold. There is the story of two men, both badly wounded, stopping overnight in the 90's at a ranch in the foothills. They carried gold dust and were fleeing from the West. They rode away next morning for Fort McLeod, but never arrived. Had they rediscovered the lost Lemon Mine only to be followed and killed by Indians?

### ONE HOOK; TWO FISH

TACOMA, Wash.—This is Bob Firch's fish story. He saw two catfish thrashing about in shallow water. He dipped his hook beneath one; snagged it by the jaw, and when he jerked the line—the other fish came out, too; caught in the mouth of the first.

Farmers who need pure bred rams or boars are urged by the livestock branch to place their orders at an early date. Purchase of rams for placement under the sheep improvement policy will be made at the fall sale around the end of October. Requirements known well in advance will enable representatives of the branch to purchase accordingly. Rams will be purchased only in sufficient quantity to fill applications. Early application will result in the possession of a fine quality sire; late application may mean disappointment.

Early application for pure-bred boars is equally important. With the rumored reduction in hog production many breeders will use the knife on their boars unless there is some assurance that these animals will be needed for breeding purposes. Even though delivery may not be required until December orders should be placed now to avoid disappointment.

**REGULATIONS RE  
LICENSES**

The Prices Board warns all holders of business licenses that they must report all changes of address and of name to the licensing division of the Board.

Regulations of the Board require all manufacturers, persons buying goods for resale, or operating a services business to hold a license. Once this has been obtained any change in the business address, the business name, or any change or modification of the business must be reported within ten days of that change to the licensing division.

The director of licensing may cancel any person's license who fails to comply with these regulations or who fails within 60 days of obtaining a license to comply with the regulations of the board concerning the fixing of the prices or who has not actually started up in the business in the manner he specified when obtaining the license.
